IVY FUTURE LEADER

For those aged 17-25.

Be it medicine, technology, education, business, politics or the arts, there are those who surpass what they do, and transform others by who they are.

They demonstrate instinctive critical judgment, creativity and a focused intelligence that translates into extraordinary leadership.

And they start young.

Harnessing leadership qualities within children at a young age is **a critical step in development and guarantees more stability and success as they navigate adulthood.**

IVY Future Leader shows you how to thrive despite distraction, to nurture focus, a commitment to responsibilities, celebrate inclusion, collaboration and most importantly – **to find ways to create cohesion in people, goals and ideas.**

The program is delivered by an esteemed panel of global leaders – professionals who have proven their exemplary leadership with industry-defining results and culture-altering ideas.

They nurture empowerment and are dedicated to guiding the next generation of visionaries, thinkers and doers.

Founded by a collective of
**Ivy League alumni to create
a global movement**

through young leaders,

moulded and motivated by
a restless passion

to make a difference **worthy of our future.**
